

Features

- Fully-featured, backpackable 2-deck smart DJ console
- 7-inch HD touchscreen with gestures
- Rechargeable lithium-ion battery for up to 4 hours of unplugged performance
- Built-in Wi-Fi and wired internet connectivity for music streaming
- Dual-bank performance pads for triggering hot-cues, loop and roll
- No-compromise, pro-grade audio and connectivity
- RCA aux input for media players, tablets, phones
- Capacitive-touch jog wheels
- Internally analyse music files & Rekordbox™ collections direct from USB
- Standalone Track Preview
- Assignable FX module, 3-Band EQ and Filter/Sweep FX
- (2) dedicated XLR (1/4-inch combo) mic inputs with EQ/Level/talkover
- USB and SD media source inputs

Features

- Fully-featured, 2-Deck standalone, smart DJ console
- 7-inch HD touchscreen with gestures
- Built-in 2.5-inch SATA drive bay to store music onboard
- Built-in Wi-Fi and wired internet connectivity for music streaming
- Capacitive-touch jog wheels with HD central display
- Internally analyse music files & Rekordbox™ collections direct from USB
- Standalone Track Preview
- Independent FX units, 3-Band EQ and Filter
- (8) Multi-function performance pads for triggered audio manipulation
- (2) Dedicated XLR (1/4-inch combo) mic inputs with EQ/Level and Talkover
- RCA aux input for media players, tablets, phones

Features

- 4-Deck standalone Engine Prime DJ system
- 10-inch HD multi-touch display with gestures
- Dedicated XLR Zone output provides music to a separate room
- Built-in 2.5-inch SATA drive bay to store music onboard
- 6-inch jog wheels with HD central display
- (4) assignable input channels for external media sources
- (2) dedicated XLR inputs for microphones with individual control
- StagelinQ connection for Event/Pro DJ lighting and video control
- Plays uncompressed audio formats (FLAC, ALAC, WAV)
- Crisp 24-bit Denon DJ legacy audio
- (4) USB and (1) SD media inputs for music playback
- USB keyboard support
- Coming soon | Serato DJ Pro control-enabled

X1800 PRIME

Professional 4-Channel DJ Club Mixer

- 4-Channel Digital Mixer with (4) phono/line switchable channels
- BPM FX section with frequency controlled 'Band-Isolation'
- Dual USB audio connections for software and audio devices.
- Dedicated Sweep and BPM FX Knobs — high-quality effects for each channel with a single knob turn
- Expressive EQ – choose Classic or Isolation modes and an Adjustable Filter Resonance Control
- 'Engine Connect' protocol for beatgrid locked FX
- Expressive Denon DJ 'Flex-Fader' Crossfader
- Connect MIDI based effects and instruments
- 24-bit/96kHz digital output for uncompromised audio quality
- Crisp OLED screen for precise menu based adjustments
- (4) Digital inputs for high-resolution audio mixing
- LAN Hub for up to four players or accessories
- Rugged metal construction

X1800 Prime

Professional 4-Channel DJ Club Mixer

Your DJ Heartbeat

The very centrepiece of the Denon DJ 'Prime Series' of products, the X1800 is a 4-Channel Pro DJ club mixer, familiar in layout but with new and exciting features to transport you to your next level of live performance. The X1800 Prime brings dedicated Sweep and BPM FX controls, delivering multi-themed effects for each channel, giving you even more performance options to craft that unique sound. Why not add another dimension to how you utilise EQ in the DJ booth? Fire up the X1800's choice of Classic or Isolation styles, then ramp up the sonic creativity with frequency-controlled, band-Isolation too.

Dominate the Dancefloor!

The X1800 Prime's crisp, OLED screen is your window into even more creative expression within your DJ sets. Personalise your workflow, access 12 additional, high-quality Denon DJ effects, then fire in the unique, quick-to-set Effects Quantization Touch Strip, engaging elegant rhythm-based adjustments to shape your sound to the max! The X1800 sports Denon DJ's 'Flex-Fader' Crossfader too, adjustable to how you like to rock the mix, with this and all other components, housed in the unit's rugged metal construction.

Craft Your Sound

Your audio source options are easily routed with the X1800 Prime's (4) Phone/Line switchable channels, plus an external signal, send and return option too. Add into the mix the (4) digital inputs at the rear, DVS capability, plus easy switching to USB inputs, and your avenues of sound are wide open. You can personalise your live performance elements with the two independent mic inputs, while monitoring the cue/split/master mix with either ¼-inch or ⅛-inch headphone connectivity. Of course, the X1800 delivers that legendary Denon DJ 24bit/96kHz sound quality—a must for demanding professionals.

Plug-in, Play!

LAN network connects Denon DJ's SC5000 media players using the 'Engine Connect' protocol to align your tempo-based FX

with even more accuracy and on-the-fly performance expression. The X1800 also has two USB audio interfaces bringing your choice of laptop based DJ software into the mix, plus handling quick and easy DJ changeovers in busy, live gig situations. Want even more connectivity? The X1800 also features a MIDI out port for your drum machines, instruments and effects boxes as well. With the Denon DJ X1800 Prime, the sky isn't the limit—you're way beyond!

Dedicated Sweep & BPM FX

The X1800's dual sweep FX knobs bring you fresh possibilities of creative expression – pick one of four 'paired' FX types (Dub Echo, Noise, Wash Out or Gate) and roll one of the dedicated channel sweep encoders to the left for one sound, and to the right to morph into another. Live and creative effects manipulation has never been so fast and expressive.

Quantize & Instant FX Touchstrip

Cut fast and furious into your tracks with the X1800 Prime Instant FX button then glide your finger across its unique FX Touchstrip to change the FX BPM and LFO's. The X1800 is literally bursting at the seams with high-quality effects, further enhanced by the 12 classic and finely tuned legendary Denon DJ effects.

Flex-Fader Crossfader

Cutting, scratching, blending and mixing just got even more personalised. Denon DJ's iconic 'Flex-Fader' technology adds adjustable resistance to the X1800's Crossfader response. Optimise your moves and control the crowd!

Dual USB Connections

Connect your laptop to one of the X1800's two USB audio connections and access your favourite DJ software. Use the second port for a back-up laptop solution, or run an alternative DJ application in tandem. If you want easy, double-up performances or hand-offs to a DJ pal playing by your side, the X1800 Prime has you covered too.

Main features of the X1800:

- 4-Channel Digital Mixer with (4) phono/line switchable channels
- BPM FX section with frequency controlled 'Band-Isolation'
- Dual USB audio connections for software and audio devices.
- Dedicated Sweep and BPM FX Knobs — high-quality effects for each channel with a single knob turn
- Expressive EQ – choose Classic or Isolation modes and an Adjustable Filter Resonance Control
- 'Engine Connect' protocol for beatgrid locked FX
- Expressive Denon DJ 'Flex-Fader', Crossfader
- Connect MIDI based effects and instruments
- 24-bit/96kHz digital output for uncompromised audio quality
- Crisp OLED screen for precise menu based adjustments
- (4) Digital inputs for high-resolution audio mixing
- LAN Hub for up to four players or accessories
- Rugged metal construction

Whats new in V1.2?

The X1800 mixer now has integrated OLED screen improvements for adjustable brightness and screensaver modes, plus a new 'limiter' icon to show if active. Utility settings for microphone send, gate and frequency adjustments are also added as well as 'tap-tempo' flexibility improvements.

- Tension adjustable, Denon DJ 'Flex-Fader' Crossfader
- 24-bit/96kHz digital output for uncompromised audio quality
- (4) digital inputs for high-resolution audio mixing
- 5-Port LAN Hub for network & StagelinQ Event lighting/video connectivity
- Rugged metal construction
- Locking IEC connector

SC5000 PRIME

Professional DJ Media Player with 7-inch Multi-Touch Display

- 7-inch HD display with multi-touch gestures
- 24-bit/96kHz digital audio outputs
- Dual-layer playback with individual audio outputs
- Plays uncompressed audio formats (FLAC, ALAC, WAV)
- 8 multifunction trigger pads for Cues, Loops, Slices and Rolls
- 8-inch rugged metal jog wheel with HD central display
- Customisable RGB colour around the jog wheel
- (3) USB and (1) SD input for music playback
- LAN output to link to up to four players
- Import Rekordbox® files and database content from an inserted USB/SD, directly into the SC5000

SC5000 Prime

Professional DJ Media Player with 7-inch Multi-Touch Display

There's a new Player in Town!

The Denon DJ SC5000 Prime represents a real paradigm shift in DJ Technology, right here, right now. This groundbreaking digital DJ Media Player has a high definition, hi-contrast display that enables multi-touch gestures for the ultimate in latency-free, tactile track navigation, load and playback. The SC5000 is also the world's first DJ Player capable of on-board music file analysis, really empowering you with its innovative dual-layer deck capability and an 8-inch rugged jogwheel with central display that displays either current playing track or custom artwork.

Engineering & Performance Innovations

Powered by a dedicated, multi-core internal processor, the SC5000 runs 'Engine Prime'. This latest version of Denon DJ's music librarian software is onboard the unit, offering you direct access and convenient performance features, so you can be at your creative best. The SC5000 doesn't stand in the way of your creativity—it works with you and gets out of the way!

Unique on the SC5000 is its bank of eight multifunction trigger pads that deliver unprecedented creative expression for your hot-cues, loops, slices and roll playback – all safely locked down by the SC5000's insanely accurate beatgrid analysis. Up to four SC5000 Players can be LAN networked for synchronised data transfer between units, plus you get enhanced BPM and FX possibilities using 'Engine Connect' protocol to work with Denon DJ's new X1800 Prime, 4-Channel mixer.

Customisable DJ Tech

Once a USB drive or SD card is inserted, the SC5000 remembers any previously entered DJ preferences, ensuring that from within the 'Engine Prime' eco-system, the unit recalls every one of your performance preferences and settings. This includes any previously performed track cue points, loop regions, playback history, preparation folders and of course any live, on-the-fly, track analysis. Like we said, the SC5000 works with you and gets out of the way!

Visual customisation is highlighted by your choice of main primary colours for the SC5000 Prime's 8-inch (touch-capacitive) jog-wheel LEDs, in addition to using your own DJ brand logo or selected track artwork on the beautiful central display. On the SC5000 touchscreen, elegant zoom-in and zoom-out of the big, beautiful track waveforms brings you to the pinnacle of musical timeline visualisation.

Audiophile Routing Beyond Expectation

The SC5000's unique dual-deck playback facility makes the unit literally '2-decks-in-1,' and with dedicated outputs for each layer, brings you imagination-driven, music playback possibilities with the ultimate in sonic and mix control. The audio outputs are 24-bit/96kHz for the very highest sound quality, and of course the SC5000 Prime plays all uncompressed audio formats, including FLAC, ALAC and WAV, plus all popular compressed music files. The Denon DJ SC5000 Prime returns you to 'The Original Artform,' bringing back passion and creativity alongside performance transparency, with the blindingly fast DJ technology that you deserve!

7-inch HD Multi-Touch Display

Engage in a new visual performance workflow with the SC5000's amazing, latency-free HD touchscreen. We make it easy to navigate through crates, playlists and your up-next 'Preparation Folder' tracks, while organising your music by category and getting lightning-fast search results using the on-screen, alphanumeric keyboard. All your vital DJ performance info is viewable, such as BPM, musical key, loop-lengths and bar/beat counter etc.

Plus with a new swipe-right to load feature, dropping tracks into the mix is a totally perfect experience. The large, tri-coloured (frequency split) waveform (drawn at 55 frames per second) can be viewed zoomed in or out with a finger pinch-gesture and shows clearly that essential beatgrid positioning throughout the track. Add this to the full-track waveform overview, for both layers (A&B), and utilise the coarse or fine adjust needle-drop touchstrip to jump to any position in your song.

Dual-Layer Deck Switching

A terrific innovation in a single Pro DJ media player, the SC5000 Prime is armed with not one, but two actual deck layers, controlled by one unit and capable of beatgrid locked synchronisation. The rear of the SC5000 has dedicated audio outputs for these layers (A&B) offering some incredible options for creative and forward-thinking DJs – you can drop an instrumental on layer 'A', with an a capella playing on layer 'B.' Or, how about looping a breakbeat on layer 'A' as your set end track, while handing off to a fellow DJ who's scratching a sax sample over the top of the mix on layer 'B' – the possibilities are endless!

Central Colour Display

At the centre of the SC5000's highly-responsive and touch-capacitive 8-inch jogwheel is our new HD circular screen. Each time a tune is loaded to the player that contains album or track artwork, it's displayed in the stunningly beautiful central area. In addition, (great for branding when the film crew is on stage with you), you can lock in custom DJ artwork, overriding the track artwork feature, for the ultimate in DJ tech customisation. Of course, all other important DJ data such as deck status, time duration and loop region lengths are displayed too.

8 Expressive Control Trigger Pads

Imagine having the creative power of using amazing laptop-based (3rd party DJ software) performance features such as creative loops, rolls, hot cue juggling and slicers – without the laptop! The SC5000 unit has eight highly tactile and responsive trigger pads, which (with the safety net industry-leading accurate beatgrids) gives you the freedom and confidence to perform astounding audio tricks, cut-up and remix tracks and reinterpret your music collection using this single media player alone. Add additional interest to more minimal tracks or conversely, re-energise an already massive club hit, rephrasing different sections to custom build the dance floor energy as only 'you' feel it. Creative DJ'ing has just entered a whole new dimension!

Whats New in V1.3.1?

- **Direct import of Rekordbox playlists, hot-cues and memory loops**

Removing the fear of change for any cautious DJ, this new feature makes any time-invested, carefully curated Rekordbox collection (of any size) directly accessible within Engine Prime v1.3.1. A quick and easy import procedure makes it simple and fast to bring in Rekordbox playlists, songs, hot cues and memory loops, all in readiness for selected collection export to the SC5000

- **Speed improvements to Serato, iTunes and Traktor imports**

With digital music collections getting larger and a DJ's time becoming more valuable, Engine Prime v1.3.1's greatly increased import speed brings in your Serato DJ, NI Traktor and iTunes music collections faster than ever.

- **SC5000/M On-Screen Editing of Crates and Playlists**

Crates and playlists can now be added, edited and removed directly on the SC5000 touchscreen without the need for a computer. DJs can now take advantage of on-the-fly creation and manipulation of their music collections, live at a gig or during prep-time at the studio.

- **Musical Key Change and Key Sync feature for SC5000/M**

Simple to use and fast to engage, DJ's can now effortlessly apply a musical key change to their tracks, up and down in single semitone increments. Instant, one button press key matching is also added and audio quality remains pristine at all frequencies. Standalone, harmonic DJ mixing is here!

- **New Search Filter criteria menu**

SC5000 users can now search massive music collections with additional criteria, like 'Comments' and 'Date Added.' Song Lists can now also be sorted using these collection criteria additions.

- **Improved High Frequency response to track playback**

Crisp and dynamic high-end frequency playback is ensured for DJs, who demand the very best audio reproduction and playback on today's mobile, club and festival sound systems. In addition, speed slider resolution is now adjustable in 0.01% BPM increments for ultimate, precise flexibility in the mix.

- **SoundSwitch StagelinQ Support**

A new update to Denon DJs StagelinQ protocol enables full control over both simplistically automated or complex programmed lightshows as the SC5000 is now functionally integrated with SoundSwitch vs1.9

Main features of the SC5000:

- 7-inch HD display with multi-touch gestures
- 24-bit/96kHz digital audio outputs
- Dual-layer playback with individual audio outputs
- Plays uncompressed audio formats (FLAC, ALAC, WAV)
- 8 multifunction trigger pads for Cues, Loops, Slices and Rolls
- 8-inch rugged metal jog wheel with HD central display
- Customisable RGB colour around the jog wheel
- (3) USB and (1) SD input for music playback
- LAN output to link to up to four players
- Import Rekordbox® files and database content from an inserted USB/SD, directly into the SC5000

Professional DJ Media Player with
10.1" Touchscreen and WiFi Music Streaming

Features

- Flagship standalone professional DJ media player powered by ENGINE OS
- HD 10.1-inch touchscreen
- Built-in Wi-Fi and wired internet connectivity for music streaming
- Responsive rubber button performance pads with sophisticated design illumination
- Built-in internal HDD drive bay to store music onboard
- 8.5-inch jog wheel with large surface area for platter manipulation
- Locking IEC connector for secured power cable
- Standalone Track Preview
- Serato DJ Pro controller mode (future update)
- Best-in-class timestretch and musical key change/sync algorithms
- Internal, on-board analysis of music files (including Rekordbox™ collections)
- Dual-layer playback with independent analogue/digital outs
- StagelinQ connection for Event/Pro DJ lighting and video control
- Plays uncompressed audio formats (FLAC, ALAC, WAV)

DENON DJ SC5000M PRIME

Professional DJ Media Player with Motorised Platter
and 7" Multi-Touch Display

Features:

- Motorised platter with real 7" vinyl
- Adjustable vinyl tension for slip/scratch control
- 2 variable torque settings (low/high)
- 7" HD display with multi-touch gestures
- 24-bit/96kHz digital audio outputs
- Dual-layer playback with individual audio outputs
- Plays uncompressed audio formats (FLAC, ALAC, WAV)
- 8 multifunction trigger pads for cues, loops, slices and rolls
- Customisable RGB colour around the platter
- (3) USB and (1) SD input for music playback
- LAN output to link to up to four players
- Includes Engine Prime music management software

Professional DJ Media Player with
8.5" Motorised Platter and 10.1" Touchscreen

Features

- Flagship standalone professional DJ media player powered by ENGINE OS
- 8.5-inch motorised-platter with torque adjustment
- New vinyl design with quick release lock
- Motor spin on/off control
- HD 10.1-inch touchscreen
- Built-in Wi-Fi and wired internet connectivity for music streaming
- Responsive rubber button performance pads with sophisticated design illumination
- Built-in internal HDD drive bay to store music onboard
- Locking IEC connector for secured power cable
- Standalone Track Preview
- Serato DJ Pro controller mode (future update)
- Best-in-class timestretch and musical key change/sync algorithms
- Internal, on-board analysis of music files (including Rekordbox™ collections)
- Dual-layer playback with independent analogue/digital outs
- StagelinQ connection for Event/Pro DJ lighting and video control
- Plays uncompressed audio formats (FLAC, ALAC, WAV)

VL12 PRIME

Professional Direct-Drive DJ Turntable With True Quartz Lock

- Isolation feet eliminate unwanted vibration and feedback
- Highest-in-industry 5kgf/cm torque on "High" setting
- Innovative 'easy grip/brake' chamfered platter redefines tactile DJ touch
- Isolated motor design, for optimal signal-to-noise ratio
- S-shaped tone arm for accurate tracking
- Reinterpreted tone arm support with dual-function 'lock or rest' feature
- Rugged all-metal tone arm base and high-quality brushed metal controls
- 2-speed operation 33 1/3 and 45 RPM (45 RPM adapter included)
- Adjustable pitch range: ±8%, 16%, 50%
- Built-in RGB lighting illuminates platter's edge
- Colour selection and brightness controls

VL12 Prime

Professional Direct-Drive Turntable With True Quartz Lock

Designed for Today, Built for the Future

The Denon DJ VL12 Prime sets the new bar position as the most superior turntable technology available today. Featuring the most optimal acoustic isolation capabilities, able to handle any loud, bass-heavy environment, there's no classic or control vinyl-based gig the VL12 cannot handle. This true quartz locked, direct-drive Pro DJ Turntable offers you the most exhilarating 'hands-on' performance experience you could ever imagine.

Powerful, Visual, Tactile, Creative!

Visually stunning and customisable to your DJ branding preference, the VL12's platter light ring can be set to a multitude of colours, with adjustable brightness and a 'lights-out' mode too. The platter itself features an easy grip/brake, chamfered shape, so you can make the most direct and subtle adjustments to your vinyl mix. The VL12's beauty and elegance needs power to complete the circle; the VL12 Prime's adjustable, and 'highest in industry' torque ensures that your mixing, scratching and cutting experience on the VL12 is always solidly accurate, so your legacy is assured.

Sounding You Out

You are defined as a DJ by your musical choices, your performance and your sound quality – The VL12 has your back on that, no questions asked, with an innovative isolated motor design resulting in the most optimal signal-to-noise ratio. The S-shaped tonearm is beautifully engineered for accuracy in tracking, sonic performance and ease of use, plus features a reinterpreted, dual function (lock/rest) support. Whether you play original vinyl, are a Club DJ, 'Battle-Style' Turntablist, or rock control vinyl in DVS mode, the Denon DJ VL12 shines above conventional OEM units, offering you the contemporary, next-level standard in legacy based performance DJ'ing.

Superior Isolation Feet

With better feedback isolation than any other Professional DJ Turntable, the VL12 Prime finally solves the issues you face when

playing vinyl in loud, bass-heavy environments. Those bass vibrations cause havoc with ordinary turntables. But the VL12 Prime has four special isolation feet, containing unique Denon DJ engineering technology that neutralise the sub-frequencies you encounter at bar, club and even festival-level DJ performances. Playing records on the VL12 is always a sure, solid, feedback-free experience.

Best Torque in the DJ Industry!

Illuminated in your selected preference of one of 12 colours, the VL12 also features the highest-in-industry torque, equalling any legendary turntable you might name. Any. The Denon DJ VL12 Prime takes you back to your roots, with superior audio, performance and visual technology to set you apart from your peers.

Easy Grip/Brake Chamfered Platter

We approached this as if the DJ Turntable platter was being invented today for you, the professional DJ, and not a sloppy adoption of a consumer product from over 35 years ago, like everyone else. The VL12's wonderfully tactile platter has an outer ring chamfer, empowering the most responsive DJ user experience when you're 'in-the-mix'. Tease, feel, push and pull, now you have the control you deserve. Only a "designed exclusively for the pro DJ" turntable can do this.

Classic Design, Innovative Support

The VL12's superb S-shaped tonearm excels in accurately tracking your vinyl grooves and is easy and familiar to set up and use. Improving on that long-established norm however, Denon DJ has reinterpreted the actual tonearm support (never originally designed for heavy duty DJ use), with a simple, but innovative dual-function, 'lock or rest' feature. This keeps the tonearm and your valuable cartridge/stylus steady at rest, secure in transit.

Main features of the VL12

- Isolation feet eliminate unwanted vibration and feedback
- Highest-in-industry 5kgf/cm torque on "High" setting
- Innovative 'easy grip/brake' chamfered platter redefines tactile DJ touch
- Isolated motor design, for optimal signal-to-noise ratio
- S-shaped tone arm for accurate tracking
- Reinterpreted tone arm support with dual-function 'lock or rest' feature
- Rugged all-metal tone arm base and high-quality brushed metal controls
- 2-speed operation 33 1/3 and 45 RPM (45 RPM adapter included)
- Adjustable pitch range: ±8%, 16%, 50%
- Built-in RGB lighting illuminates platter's edge
- Colour selection and brightness controls

DS1

Serato Digital Vinyl Audio Interface

- Premium Digital Vinyl System (DVS) interface for Serato DJ
- Interfaces, turntables and CD players using Serato NoiseMap with a Serato DJ-based digital music library
- Plug and play with Serato DJ and Serato DVS Expansion Pack-no purchase necessary
- (2) sets of stereo RCA inputs and outputs for left and right decks

DS1

Serato Digital Vinyl Audio Interface

The DS1 Serato Digital Vinyl Audio Interface: For The Love Of Vinyl

Compact and feature-packed, the DS1 smashes the price/performance barrier for professional DJs.

More Than You Hoped For

Throw your assumptions out the window - the DS1 is a breakthrough interface for users of Serato NoiseMap™-the system used to control a Serato-based digital music library when you're using a turntable or CD player. The DS1 is plug-and-play with Serato DJ, extending Denon DJ's famous audio quality and reliability to club DJs and turntablists who prefer the feel of vinyl, but still want the flexibility that a digital music library provides.

It Specialises in Hookups

At the heart of the DS1 is a bi-directional audio interface with two sets of RCA stereo inputs for turntables or professional CD players. As DJs manipulate the vinyl or CD NoiseMap signal, Serato DJ software mirrors the control signal-controlling digital tracks on-screen in real-time for beatmatching, cueing, scratching, and track juggling. Playback audio is distributed by the DS1 to a mixer or loudspeaker system in studio-grade 24-bit quality via two sets of RCA stereo outputs. In other words, connect anything you need and the DS1 will always send out a great signal-clean, clear and true to the music.

Small. But Fierce.

Denon DJ's DS1 is smaller than most smartphones, making it an ideal companion for the travelling DJ. The rugged, all-metal construction easily survives constant transport, setup and breakdown. A single USB cable handles power and audio duties,

greatly simplifying operation. Inputs are phono/CD selectable with a grounding post for turntable use. It's all there. You're covered.

All the Bases-Covered.

With its precise, dependable tracking and remarkably clear audio, the DS1 ushers in a new wave of performance for the hands-on DJ

Key Features

- Premium Digital Vinyl System (DVS) interface for Serato DJ
- Interfaces, turntables and CD players using Serato NoiseMap with a Serato DJ-based digital music library
- Plug and play with Serato DJ and Serato DVS Expansion Pack - no purchase necessary
- (2) sets of stereo RCA inputs and outputs for left and right decks

Technical Specifications

Audio Interface	24-bit
Sampling Rates	44.1kHz, 48kHz, 88.2kHz, 96kHz
Connections	2 stereo RCA input pairs (selectable CD-level or phono-level with grounding terminal) 2 stereo RCA output pairs 1 USB 2.0 port
Power	USB-bus-powered
Dimensions (width x depth x height)	4.7" x 3.0" x 0.9" 11.9cm x 7.7cm x 2.3cm
Weight	0.55 lbs. 0.25kg

DENON DJ

AXIS 8

ACTIVE 2000-WATT 8" 2-WAY COAXIAL SPEAKER SYSTEM

PRODUCT OVERVIEW

The all-new Axis Series of high output, self-powered speakers are designed to deliver superb sound for the most demanding portable music playback applications. The Axis 8 speakers utilise a novel coaxial design where the high frequency compression driver is mounted coaxially (at the apex) of the system's low-frequency driver. This design—known as coincident mounting—ensures a time and phase coherent output, which markedly improves definition and clarity. The coaxial driver design also reduces the cabinet height by more than 30% compared to conventional speakers, making for compact units with markedly reduced visual bulk for maximised audience sightlines—a critical consideration for live performances.

PRODUCT FEATURES

- High-power 2000-watt Class D digital bi-amplification
- Massive power, light weight and reliability
- Precision coaxial drivers
- Optimised music performance in a compact enclosure
- Long-excursion woofers deliver deep, punchy bass and high acoustic output
- Coaxially-mounted 1.75" high-frequency compression driver with 1" acoustic aperture
- Speakers' sound is propagated in a seamless, uninterrupted time envelope
- Coaxial design reduces cabinet height by over 30% vs. conventional speakers
- Uniform horizontal and vertical dispersion delivers optimum sound coverage
- On-board DSP controls an internal 5-band parametric EQ

DENON DJ

AXIS 12

ACTIVE 2000-WATT 12" 2-WAY COAXIAL SPEAKER SYSTEM

PRODUCT OVERVIEW

The all-new Axis Series of high output, self-powered speakers are designed to deliver superb sound for the most demanding portable music playback applications. The Axis 12 speakers utilise a novel coaxial design where the high frequency compression driver is mounted coaxially (at the apex) of the system's low-frequency driver. This design—known as coincident mounting—ensures a time and phase coherent output, which markedly improves definition and clarity. The coaxial driver design also reduces the cabinet height by more than 30% compared to conventional speakers, making for compact units with markedly reduced visual bulk for maximised audience sightlines—a critical consideration for live performances.

PRODUCT FEATURES

- High-power 2000-watt Class D digital bi-amplification
- Massive power, light weight and reliability
- Precision coaxial drivers
- Optimised music performance in a compact enclosure
- Long-excursion woofers deliver deep, punchy bass and high acoustic output
- Coaxially-mounted 1.75" high-frequency compression driver with 1" acoustic aperture
- Speakers' sound is propagated in a seamless, uninterrupted time envelope
- Coaxial design reduces cabinet height by over 30% vs. conventional speakers

DENON DJ

AXIS 12s

2000-WATT 12" ACTIVE SUBWOOFER

PRODUCT OVERVIEW

The all-new Axis Series of high output, self-powered speakers are designed to deliver superb sound for the most demanding portable music playback applications. The Axis 12s Active Subwoofer delivers muscular, authoritative low-end response to any setting using a high-power 12" heat-treated woofer with 3" voice coil. With a frequency response that extends to 38Hz and maximum SPL in excess of 120dB, the Axis 12S easily handles the toughest assignments, plus simple transport and setup is assured thanks to standard pole-mount 35mm threaded inserts and built-in handles.

PRODUCT FEATURES

- High-power 2000-watt Class D digital bi-amplification
- 12" heat-treated woofer with 3" voice coil
- Input: Female XLR Balanced Differential
- Outputs: Full-range Male XLR Balanced; High Pass Male XLR Balanced
- Heat Protection: Thermal trigger/Convection fan
- Distortion Prevention: Digital limiter/compressor with Red LED Clip Indicator
