

YELLOW SOUNDS BETTER.

CLASSIC 5 PROFESSIONAL STUDIO MONITORS

TIME-TESTED. TIME TRUSTED. LEGENDARY PERFORMANCE.

The KRK CLASSIC 5 powered studio monitors incorporate over 30 years of innovation from the world's leading studio monitor manufacturer. The CLASSIC 5 defaults to a new FLAT frequency solution towards more critical listening—transpiring into more accurate mixes.

- Versatile powered nearfield studio monitor, great for any style of music
- Soft-dome tweeter with optimized waveguide provides smooth, pristine and articulate highs up to 35kHz
- Lightweight, glass-aramid composite woofer delivers clear midrange and tight bass
- Flat Low Frequency Adjustment adding versatility and improved accuracy for mixes that translate in different environments
- Superior low-end extension with optional setting of +2dB KRK Bass Boost
- Factory installed under-monitor foam pad provides isolation between the speaker and surface
- Front-slotted bass port and resonant-free cabinet increases sonic clarity
- System-optimized auto-limiter prevents unexpected peaks from damaging the speaker at high volumes

ROKIT G4 PROFESSIONAL STUDIO MONITORS

#1 IN THE WORLD.

The KRK ROKIT line has been the #1 selling monitor in the world since its inception. Completely re-engineered and redesigned, the new ROKIT G4 (Generation 4) lineup expands and exceeds beyond the legacy performance for which the ROKITs are known. The standalone KRK Audio Tools App available for free in the Google Play and iOS App Stores sends and analyzes pink-noise through your room, and then suggests the best EQ setting on the LCD.

- Onboard LCD visual DSP-driven EQ works with KRK Audio Tools App for room correction
- Matching woofer and tweeter made with Kevlar®
- All new front-firing port has exceptional low-end accuracy, clarity, extension, punch and offers flexible room-positioning
- Built-in efficient Class D power amp
- 25 visual Graphic EQ settings for different environments
- High density acoustic Iso-foam pads for improved clarity
- Newly designed Brickwall Limiter automatically engages at maximum amp level
- Wide, deep and dynamic listening “sweet-spot” with incredible imaging
- 3D soundstage creates incredible realism and depth in your mix (width, depth and height)
- System-optimized auto-limiter prevents unexpected peaks from damaging the speaker at high volumes

V SERIES 4 PROFESSIONAL STUDIO MONITORS

THE INDUSTRY'S (NOT SO SECRET) WEAPON

Now known as legendary in the work-horse studios around the world, the KRK V Series are two-way, full-range studio reference monitors with professional performance and accuracy for recording, mixing and mastering.

- 1" KRK custom designed tweeter made with Kevlar®
- 4" KRK custom designed Woven woofer made with Kevlar®
- Optimized front ported bass reflex enclosure design
- Bi-amped Class-D amplification
- Acoustic and desk loading condition correction Low Frequency EQ's
- Mid and High Frequency EQ's
- 49 different DSP driven EQ presets give you superior control for room/desk correction
- Precise input level attenuation switch
- Standby, ground lift, input sensitivity, and logo LED selectors
- Optional protective grille **included** for mobile broadcast applications
- Friction lock, Neutrik combo (XLR and TRS) connector
- Robust EVA foam pad for non-skid and acoustic isolation
- Universal threaded mounting bracket points
- System-optimized auto-limiter prevents unexpected peaks from damaging the speaker at high volumes

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

KRK S2 SERIES 8" 10" 12"

POWERED STUDIO SUBWOOFERS

The S2 Series powered studio subwoofers build upon KRK's legacy for sonic accuracy on the low-end spectrum delivering tight, defined bass. The Class-D power amplifier dramatically increases transient response, control and punch, while the four-position selectable crossover lets you easily adjust the subwoofer setting to your existing monitors.

- Optional Bypass Footswitch
- Mix with confidence. The bypass footswitch control allows you to quickly mute the sub and send full-range audio to your recording monitors
- Heavy Duty Enclosure
- KRK Subwoofers feature reinforced MDF enclosures for maximum strength and durability
- Engineered front port provides low frequency extension while reducing boundary coupling. The unique shape is optimized to avoid port turbulence
- Not only for KRK monitors—Improves any setup with any other branded monitors.
- Dedicated crossover and optional High-pass filter bypass means S2 subwoofers are the perfect complement to powered monitors

KRK 12sHO

HIGH OUTPUT POWERED STUDIO SUBWOOFERS

Large and powerful nearfield studio monitors require a professional subwoofer that can achieve high sound pressure levels—and KRK's 12sHO is a powerful, sonically pure addition to any studio setup. Whether for stereo or surround formats, the 12sHO subwoofer reproduces incredible low-frequency detail as well as the LFE channel's demanding bass content. The demands of accurately mixing low frequencies exceeds the capabilities of traditional low-frequency subwoofers, so KRK developed the 12sHO (HO for "High Output") as the industry solution for all types of demanding mix situations.
